## INTERNATIONAL SEARCH REPORT

International application No.

PCT/AU00/00249

| A.   | CI ASSIEICATION OF SUPERGRAPA   |  |                       |
|--|---|--|-----------------------|
|  | CLASSIFICATION OF SUBJECT MATT  |  |                       |
| Int. Cl. <sup>7</sup> :  | C07H 21/04, C12N 9/02, 9/04, 5/10, 15/29, 15/53   |  |                       |
| According to International Patent Classification (IPC) or to both national classification and IPC  |   |  |                       |
| В.   | FIELDS SEARCHED   |  |                       |
| Minimum documentation searched (classification system followed by classification symbols) IPC: C07H 21/04, C12N 9/02, 9/04, 5/10, 15/29, 15/53   |   |  |                       |
| Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched AU: IPC as above   |   |  |                       |
| Electronic data base consulted during the international search (name of data base and, where practicable, search terms used) MEDLINE; CHEMICAL ABSTRACTS; BIOSIS; WPIDS; STN [Keywords: codeinone reductase]   |   |  |                       |
| C. DOCUMENTS CONSIDERED TO BE RELEVANT   |   |  |                       |
| Category*  | Citation of document, with indication, where  | appropriate, of the relevant passages                            | Relevant to claim No. |
| P,X  | Unterlinner, B. et al., "Molecular cloning and functional expression of codeinone reductase: the penultimate enzyme in morphine biosynthesis in the opium poppy Papaver somniferum". Plant Journal, June 1999, Vol. 18, No. 5, pp 465-75. |  | <u>1-42</u><br>43-62  |
| A  | Lenz, R. et al., "Purification and properties of codeinone reductase (NADPH) from Papaver somniferum cell cultures and differentiated plants". European Journal of Biochemistry, 1 October 1995, Vol. 233, No. 1, pp 132-9.               |  | 1-62                  |
|  | Further documents are listed in the continua  | tion of Box C See patent fami                                    | ly annex              |
| Special categories of cited documents:  "A" document defining the general state of the art which is not considered to be of particular relevance  "E" earlier application or patent but published on or after the international filing date  "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified) document referring to an oral disclosure, use, exhibition or other means  "P" document defining the general state of the art which is not considered to be of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone document referring to an oral disclosure, use, exhibition or other means  "A" document defining the general state of the art which is not considered to be of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art document member of the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art document member of the same patent family  Date of the actual completion of the international search  "T"    later document published after the international filing document in conflict with the application but cited to understand the principle or theory underlying the invention document is document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is document of particular relevance; the claimed invention cannot be considered to involve an inventive step w |   |  |                       |
